# Powerful Wireless LAN Technology

Our enterprise grade solution offers the best-in-class performance, ease of installation and managed network.

It is the next generation of Wi-Fi connectivity offering higher bandwidth, higher capacity, and less interference, while providing ease and reliable management.

Designed for the working environment, our wireless solutions they reach beyond the limits of existing wireless networks. They incorporate the latest technologies to address the specific needs of voice and video without reducing speed.

With more coverage and less interference, our technology applies the handover methodology used within mobile communications to deliver seamless roaming.

## WLAN Controller

You have complete control of your wireless connectivity with a seamless, automatic handover when moving between access points.

Manage and control your wireless connectivity with a range of high performance WLAN controllers ensuring everyone is connected, regardless of the size of the business.

- Optimised wireless connectivity
- Enhanced security
- Guaranteed coverage
- Cost effective
- Provides stability
- Operational convenience

# Guaranteed Coverage

Our multi- antenna technology ensures that you have seamless connectivity wherever you are in your office. This provides stability and operational convenience with wired / wireless integrated management.

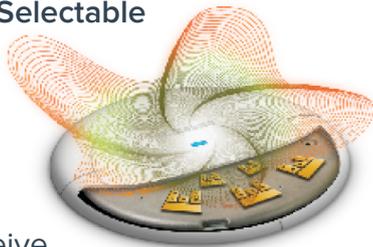

## Key Benefits

**Guaranteed Airtime** - We give you complete control and allow you to allocate airtime when multiple devices are concurrently connected to an access point.

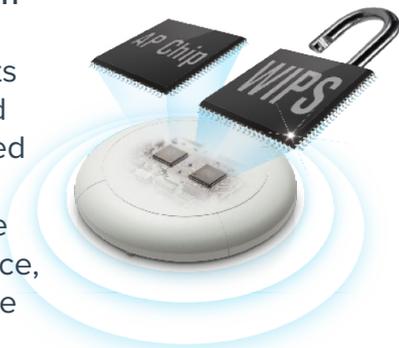

### Intelligent Beam Selectable Antenna

Maximise your service coverage with 14 antenna access points, ensuring you receive a signal from a mobile device anytime, anywhere.

### Wireless Intrusion Prevention

The access points have a dedicated security monitored chip embedded, which is separate to the Wi-Fi service, enabling real-time monitoring.

### Remote Management

With this tool, you can use your smartphone to remotely control the wireless network anytime, anywhere and quickly respond to any issues with easy and clear identification.
